Why modular matters

## Modern benefits require modern design

> Our modular approach integrates best-in-class service providers that complement our core offerings. Unlike one-size-fits-all models, our approach gives clients the flexibility to select vendors and functions that align with their strategic goals. Whether managing certain functions internally or integrating third-party partners, our model delivers clear coordination, cost control, and scalable performance.

Key advantages:

1. Full transparency on service costs and outcomes
2. Seamless technology integration
3. Vendor choice with best-in-class partners
4. Rapid response to changing regulations
5. Scalable support for evolving business needs

Remove numbers to avoid perception of an order of importance.

This section needs an image. Can we represent the caption by adding a graphic of multiple pieces plugging into a central hub?

## Strategic functions supported

We have successfully integrated a wide range of third-party platforms and services across critical pharmacy solution functions, including:

1. Claims processing
2. Clinical and care management programs
3. Utilization management
4. Specialty pharmacy
5. Prior authorization
6. Network management
7. Rebate management

Our approach ensures clients get the right solution for every function without sacrificing coordination or quality.

Outcomes you can count on

## Measurable results for plans and members

The modular model helps clients reduce costs, improve clinical outcomes, and streamline operations. PerformRx clients benefit from:

1. Lower drug spend and reduced trend
2. Improved member engagement and adherence
3. Transparent pricing and pass-through savings
4. Rapid system integration and scalability
5. Compliance with Medicaid, Medicare, and commercial requirements

## Rooted in clinical excellence. Driven by innovation.

> Since 1999, PerformRx has been a pharmacist-led, full-service PBM dedicated to patient health, operational transparency, and clinical integrity. **Our modular model is designed to meet evolving industry demands with precision and flexibility.**

### Our values

1. **Patient advocacy**
   Ensuring care decisions prioritize member health
2. **Clinical excellence**
   Programs designed and managed by pharmacists
3. **Innovative solutions**
   Leveraging technology for smarter performance
