

The PerformPlus® Open Arms Program for Employment Services Providers

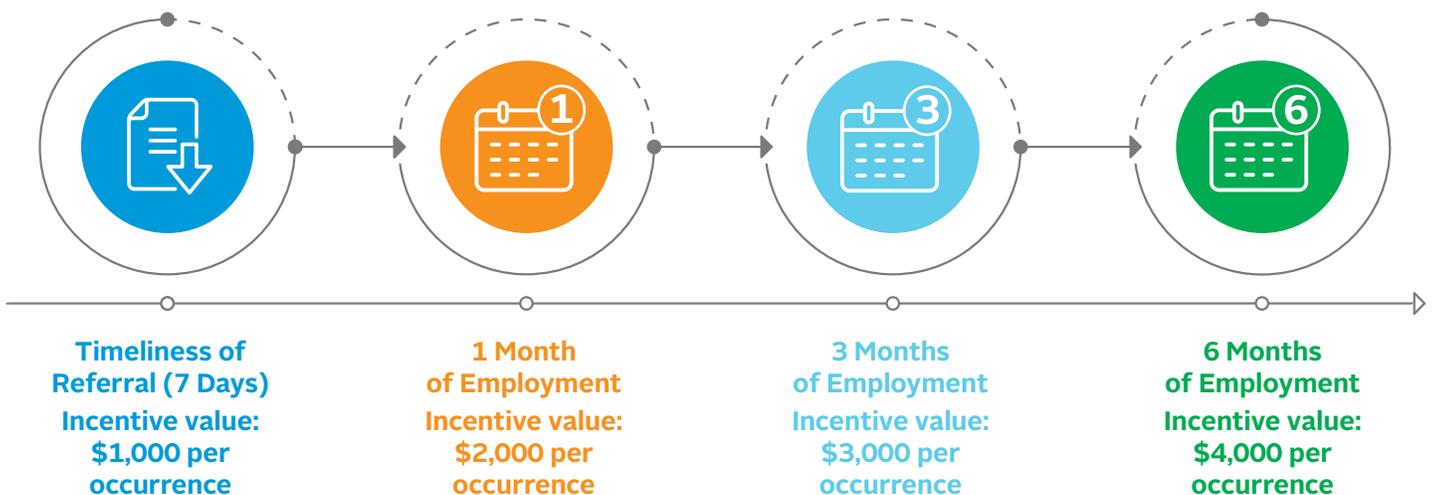

A value-based incentive payment program designed for employment waiver services providers who deliver and provide appropriate employment resources for our Participants that lead to gainful and long-lasting employment.

Our goal at AmeriHealth Caritas Pennsylvania (PA) Community HealthChoices (CHC) is to assist our Nursing Facility Clinically Eligible (NFCE) Participants ages 21 to 64 in securing and maintaining employment, as they choose. This Open Arms incentive payment program was developed for employment providers that successfully support our Participants locating employment in addition to providing ongoing support, coaching, and education to Participants after employment to promote and ensure employment retention.

Highlights of the Open Arms for Employment Services program:

- An upside-only agreement — meaning no withholds or losses are absorbed by providers
- Unique focus on incentivizing transitional milestones for specific long-term services and supports (LTSS) population
- Evolving focus on the continued development of outcomes measures for Participants after a successful employment is secured and maintained within the community.

Key performance and transitioning milestones in the Open Arms for Employment Services program are listed here.

Providers will receive upside-only incentive payments for each milestone of the Open Arms for Employment Services program.
